About Our Company

Scintel Technologies Inc. is an Atlanta, GA based company that assembles solutions to business problems for Global 2000 organizations through the application of outsourcing and enterprise consulting. We partner with our clients to conceptualize and realize technology driven business transformation initiatives by using a low-risk delivery model to accelerate schedules with a high degree of time and cost predictability. Our Technology and Delivery Innovation initiatives ensure that our clients are constantly equipped with solutions, frameworks and skills to meet emerging opportunities and threats.

Job Summary

Scintel is looking for a Business Objects Reports Developer whose responsibilities include (but are not limited to)

- To perform analysis, design, develop, test and implement Business intelligence solutions using Business Objects XI R2
- To provide support, maintenance and issue investigation and resolution for front and back-end ETL processes.
- To work closely with the business and project teams to understand, document and design ETL processes and needs.
- To develop and maintain Business Objects Universes.
- To plan and coordinate ETL and database roll-outs with project team members, development and database engineers.
- To develop and maintain mapping logic to move data content from varied sources systems to the data warehouse and data marts.
- To provide training and mentorship to other team members on Business Objects/Crystal Reports and Data Warehouse Reporting skills.
- To provide detailed project documentation.
- To assist in defining project scope or phase of a project
- To define technical and business specifications
- To assume ownership in technical capacity by adding value to the project to deliver the assigned task/project.
- To plan, engage and manage meetings with internal customers towards the accomplishment of key project initiatives

- To participate in the entire development life cycle to ensure the projects are properly set up, make sure the correct delivery process is used and the deliverables are accurate
- To analyze business needs, defect trends, and coordinate recommendations with development team.
- To work with application and project team professionals in establishing priorities as they relate to business objectives.
- To integrate thorough knowledge of key business processes to communicate and translate complex needs to technical solutions.

Skill Requirements

- Bachelor's degree in Computer Science, Engineering, or related discipline is required
- 8 plus years of experience in IT, 5+ years in Data warehousing and at least 3-4 years of working with Business Objects.
- Highly qualified candidates will have experience with the following technologies/languages:
 - Business Objects Data Integrator
 - Business Objects Universes
 - Crystal Reports
 - WEBi Report Templates
 - T-SQL
 - DTS
 - Microsoft SQL Server (2000 and 2005)
 - DB2
 - Experience with ETL technologies preferred.
 - In depth understanding of Business Objects Report Development.
 - Knowledge and experience designing, developing, debugging and deploying SQL Server stored procedures, triggers, T-SQL, and DTS.
 - Knowledge of Microsoft SQL Server strongly preferred.
 - Working knowledge of business productivity tools: e-mail, Microsoft Word, Microsoft Excel.
- Self Starting with a results-oriented mindset for both short and long term initiatives.
- The ideal candidate will possess good organizational skills with the ability to balance and prioritize work, multi task, and possess analytical and problem solving skills to trouble shoot system problems.
