About Our Company

Scintel Technologies Inc. is an Atlanta, GA based company that assembles solutions to business problems for Global 2000 organizations through the application of outsourcing and enterprise consulting. We partner with our clients to conceptualize and realize technology driven business transformation initiatives by using a low-risk delivery model to accelerate schedules with a high degree of time and cost predictability. Our Technology and Delivery Innovation initiatives ensure that our clients are constantly equipped with solutions, frameworks and skills to meet emerging opportunities and threats.

Scintel Technologies offers an outstanding compensation package along with generous vacation, sick and holiday pay. For qualified positions, we also offer comprehensive health benefits including medical, dental and life insurance as well as retirement benefits, including a 401(k) program.

Job Summary

Scintel is seeking a Project Manager to provide project management and technical leadership for a variety of development and maintenance projects working on assignment at one of their clients in the US. Activities include definition of scope, schedules, resources, costs, risk identification and mitigation, quality plans and communications using standard methodologies. The candidate must be proficient in systems analysis and design and be able to help onsite resources as necessary to develop systems using an offshore model.

Roles & responsibilities include, but are not limited to:

- Delivering, organizing, guiding and directing all activities and functions in the delivery of information technology in support of the company's business needs and corporate objectives.
- Interacting with the client, developing requirement documents and program specifications and directing the efforts to the onsite team.
- Responsible for the planning and development of computer applications including but not limited to: project scheduling, design, construction, testing, implementation technical support, user training support, and

contingency planning following System Development/Project Life Cycle procedures.

- Responsible for the successful cross functional delivery of all assigned projects.
- Assisting in gathering and defining requirements for the projects
- Assisting in providing 24/7 support to the Onsite/offshore team as required
- Must possess knowledge of System Development Life Cycle methodology and business systems design
- Assisting in resolving all production problems based on the SLA's set by the client and if escalated
- Communicating application development/Production issues and directions to executives, management and peers.
- Providing support and assistance to the client
- Supervising staff by scheduling projects based on skill level, assess technical ability, recommend training and provide hands on support.

Qualifications

Successful applicants will possess the following qualifications:

- Bachelor's degree in Computer Systems/ Engineering /Business Management
- 15 plus years of hands-on experience in analysis, design and implementation (along with project leadership experience)
- 12 plus years of experience in IBM mainframe technologies, OS/390 utilities, COBOL, CICS, DB-2, JCL, ENDEVOR, TSO/ISPF.
- 10 plus years of experience in leading and managing large projects.
- Experience with CA/Datacom and ROSCOE a big Plus.
- Knowledge of VB (or .NET), Oracle, UNIX and middleware concepts highly desirable.
- Ability to work on fairly complex technical projects
- Excellent written and verbal communications abilities
- Detail oriented with strong organization and time management skills
- Must have good follow-through abilities on work commitments
- Maintains a positive and professional demeanor
- PMP certification is a plus

If you meet the above qualifications we invite you to apply now to hруса@scintel.com
