Scintel is dedicated to build it's brand and service offering
by creating talent teams of problem solvers with a variety
of consulting technology and business backgrounds.

About Our Company

Scintel Technologies Inc. is an Atlanta, GA based company that assembles solutions to business problems for Global 2000 organizations through the application of outsourcing and enterprise consulting. We partner with our clients to conceptualize and realize technology driven business transformation initiatives by using a low-risk delivery model to accelerate schedules with a high degree of time and cost predictability. Our Technology and Delivery Innovation initiatives ensure that our clients are constantly equipped with solutions, frameworks and skills to meet emerging opportunities and threats.

Job Summary

The ABAP Lead will be responsible for the following: Provide technical leadership for Production Support and Projects, with main focus on Production Support. Be a good team player, especially with the functional team leads, and the GCC team leads, Integration Lead, and Basis Lead. The ABAP Lead must have strong verbal and written skills in English. Collect, analyze and interpret data to be used in ABAP development. Mentor other more junior ABAP Developers. Think critically and independently. Provides direction and communicates to key executives as to the technical progress. Global and offshore experience is a preference.

Major Accountabilities

- Develop and maintain programs to enhance the assigned application module using the SAP development tools (ABAP, SAPScript, iDocs, BAPI, RFC).
- To develop quality code and its associated documentation adhering to team and departmental development standards.

- Collaborate with the SAP Project Management, Business and Systems Analysts and user departments to develop specifications for system enhancements for continuous functional improvement. Monitor, support and maintain the existing infrastructure.
- Develop Test Plans and automated scripts to assure expected performance quality levels meet standards in development efforts.
- Implement technical architecture surrounding the SAP package.
- To demonstrate a logical and structured approach to time management and task prioritisation.
- The ABAP Team Lead should maintain good working contacts within the department and ensure they know where to find information and responsible parties within the rest of IT. They should always maintain positive customer relationships.
- Conduct work effort estimation; develop execution work plans, and follow-up on work progress.
- Manage development teams onshore and offshore.

Minimum Education Requirements

- University degree in Computer Science or related Information technology field.

Minimum Experience Requirements

- Experienced manager comfortable working in environment with many competing interests
- Comfortable managing and mentoring teams, internal and external
- 5+ years of experience programming in ABAP
- Has extensive knowledge and skill in ABAP programming and the following areas:
 - Object Oriented programming
 - Report writing using ALV and ABAP lists
 - Sapscripts and smart forms
 - Dialogue programming
 - Interfaces
 - BADIs/BAPIs
 - User exits/enhancements
 - BDCs
 - Workflow
 - WebDynpro
 - LSMW

- Excellent analytical mind to question program enhancements that may not be necessary with work-around from the SAP system
- Excellent interpersonal and communication skills
- Experience with SAPScript, EAI tools (TIBCO) and SAP XI or PI is an advantage
- Broad knowledge of SAP functional areas particularly FI-CO, SD and MM.
- SD configuration experience desirable
