WE KNOW RETAIL

Retail Powered by Scintel

Retail organizations face pressures on a daily basis. You need the right partner to help you navigate the ever-changing retail technology landscape. Scintel offers a robust set of IT services that retail organizations can depend on to meet and surpass expectations of what IT can, and should, do. Scintel allows you to:

- Respond instantly to unanticipated demand
- Optimize price lifecycles
- Enrich your supply chain and mitigate risk
- Improve loss prevention tools and technologies
- Explore new avenues for online and mobile commerce

The Right Partner

We understand the urgency of the business, volatility of market conditions, pressure to meet profit margins and the need to differentiate. As your partner, Scintel utilizes this knowledge and experience to create solutions specific to your retail environment.

IT solutions are complex. We keep it simple.

Scintel works with you to create solutions aligned with your current business processes. No changes. No complexities. Whether you are looking to improve supply chain management, make better markdown decisions or determine the best merchandise mix, Scintel simplifies the process and provides solutions to some of the most complex IT issues retailers face.

Scintel knows Retail.

Our leadership team includes former high-level retail IT executives who know how to translate effective technology into bottom-line results. We have one of the largest retail teams in the industry, but we still take the time to understand your unique challenges and develop solutions that directly impact your bottom line. Want proof? A major retailer has cut production support costs by over 50% by partnering with Scintel.

Accountability, consistency, value.

Scintel provides an unprecedented level of consistency and thoroughness. Just like you, we hold ourselves accountable for every aspect of every project. We set aggressive goals, take the lead, and deliver outstanding results down to the last critical detail. From production support to software development to BI and data warehousing, we pride ourselves on our work and the value we can offer you as a client.

“Since assuming responsibility for our logistics application support, Scintel has reduced our processing errors by over 80%. The number of logistics systems problem tickets has also been reduced by 65%, while maintaining 99.9% system availability and an annual savings of over \$1M.”

– major retail chain IT executive

Innovation not interruption.

Scintel's technical and industry expertise goes well beyond IT development and support. Our vast knowledge base allows us to attack any project quickly and productively, regardless of the size or scope. Ask us how we can help you quickly and efficiently implement RFID hand-held applications, develop EDI data mapping solutions, create decision support dashboards, provide enterprise visibility into the global supply chain and more.

The Scintel Difference

Scintel is your partner in the truest sense of the term. We work as an extension of your own team putting our resources and reputation on the line. That's how we built our business – with integrity, accuracy, and delivery that is on time, on budget, and exceeds expectations.
