About Our Company

Scintel Technologies Inc. is an Atlanta, GA based company that assembles solutions to business problems for Global 2000 organizations through the application of outsourcing and enterprise consulting. We partner with our clients to conceptualize and realize technology driven business transformation initiatives by using a low-risk delivery model to accelerate schedules with a high degree of time and cost predictability. Our Technology and Delivery Innovation initiatives ensure that our clients are constantly equipped with solutions, frameworks and skills to meet emerging opportunities and threats.

Job Summary

Scintel is looking for a Systems Data Architect to plan, design, develop, and modify complex databases and systems structures. Responsibilities include but are not limited to:

- To analyze 10 different COTS applications and their Unique schema then figure out what database architecture should look like that which minimizes data replication without sacrificing performance
- To address issues related to data migration (validation, clean-up, and mapping), as well as an understanding of the importance, proper structure, and proper content of data dictionaries.
- To identify best practices and provide technical support for the following activities: data modeling, identifying any database/architecture redundancies in the organization.
- To provide critical recommendations and solutions from the data/systems architecture perspective for complex problems throughout all phases of the Systems Development Lifecycle (SDLC); provide technical briefing and reports; participate in meetings and walkthroughs; analyze problems and provide solutions; provide support to application analysis, development, and validation team(s); and conduct research.
- To interface effectively and collaborate with others to develop solutions and ensure stakeholder buy-in.
- To provide project architecture support to create conceptual and logical designs; support project team(s) in the creation of physical designs and specifications.

- To develop, manage, and support processes and procedures to ensure the continued evolution of standards,

Mandatory Skills Required

- Bachelors Degree required with a minimum of 15 years of experience
- Demonstrates an end-to-end vision for translating logical design into one or more physical databases and/or systems, as well as identifying the data flow through the successive stages and applications.
- Oracle BEPLE; OLAP; ODBC & JDBC
- Data warehouse expertise design and implementation
- Oracle SQL stored procedures expertise
- System integration experience large scale
- UNIX shell scripting
- DBA experience and dB tuning
- Must Speak and write Spanish & Speak Portuguese
- Must have RFP writing expertise

If you meet the above qualifications we invite you to apply now to hруса@scintel.com
